The issue of migration has become a focal point of public discourse in Europe on all sides of the political spectrum. However, amidst the cacophony of voices, a troubling phenomenon has emerged – the proliferation of disinformation. Misleading narratives and false claims about migration not only undermine the democratic process but also hinder the development of informed policies. Therefore, it is imperative to recognize and address the importance of exposing the truth behind disinformation on migration in Europe.

To discuss this theme, the Istituto Affari Internazionali is organising a **Public Debate** entitled “**Disinformation on migration: between facts and political narratives**”, which will take place at the **Università di Roma Tre** on **20 October 2023** between **09:30 am** and **01:30 pm CET**. The event will take place in **ITALIAN**.

A cornerstone of any healthy democracy is an informed electorate. When citizens are subjected to misinformation, their ability to make rational, evidence-based decisions is compromised. Disinformation campaigns on migration often prey on fears and uncertainties, polarizing communities and eroding trust in democratic institutions. Exposing these falsehoods is essential for maintaining the integrity of the democratic process.
